

# The font-size-adjust Property

**Note:** Only Firefox supports the font-size-adjust property.

## **Two divs with the same font-size-adjust property:**

You control the font size better with the font-size-adjust property.

You control the font size better with the font-size-adjust property.

## **Two divs without the font-size-adjust property:**

You control the font size better with the font-size-adjust property.

You control the font size better with the font-size-adjust property.
