count: 2; /* defines two columns */ column-gap: 0.25in; /* defines the gap width */ ... }
```

Journal Layout

In this example the columns are defined by width and their content is laid out to fully fill each column before beginning the next rather than balancing all column heights equally. The gap is a little bigger, to leave room for written side-notes.

Article with Single-Content Columns

This simple example shows how content like a heading or image can be made sole content of a column using manual column breaks.

United States Capitol

The United States Capitol is the meeting place of the United States Congress, the legislature of the federal government of the United States.

Located in Washington, D.C., it sits atop Capitol Hill at the eastern end of the National Mall. Though it has never been the geographic center of the federal district, the Capitol is the origin by which both the quadrants of the District are divided and the city was planned. Officially, both the east and west sides of the Capitol are referred to as "fronts."

603 x 1293

Historically, however, only the east front of the building was intended for the arrival of visitors and dignitaries.

Like the federal buildings for the executive and judicial branches, it is built in the distinctive neoclassical style and has a white exterior.
